Abstract. In this paper are presented the results of the ASO international project “The Role of Education for the Duration of Unemployment” for Gorj County. Using techniques to estimate models for duration data, like the Kaplan Meier method and Cox’s proportional hazard model, this project answer to the following question: does the education level influence the duration of unemployment in Gorj County? The influences of age and gender on duration of unemployment spells are also estimated.

JEL Classification: J40, J46

Keywords: unemployment, education level, labor market, gender
